

CSCD379

.NET Web Application Programming

Course Syllabus

CSCD379 Schedule:

Time and Locations:

Section 01: Lecture: 1:00 – 1:50 MTRF, CEB 228
Lab: Wednesday (TBA)

Instructor: Chris Peters

Office: CEB306

Office Hours: 10:00 – 10:50 Monday through Thursday or by appointment

Phone: 359-4820 (forwarded to cell)

Email: cpeters@ewu.edu

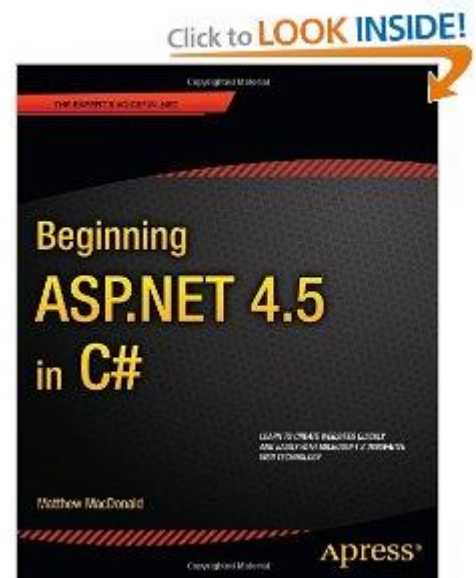

Textbooks:

Beginning ASP.NET 4.5 in C#

Author: Matthew MacDonald

ISBN-10: 1430242515

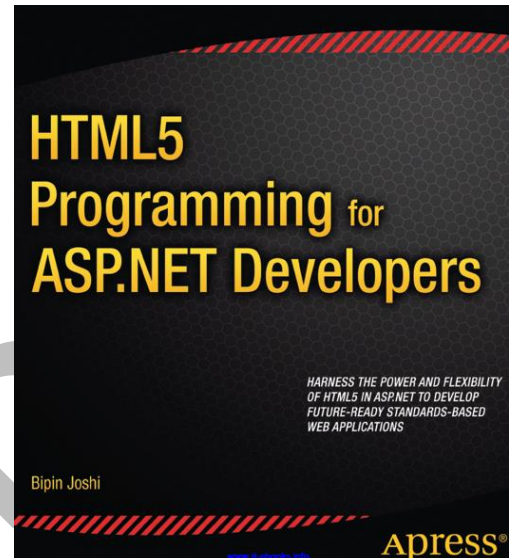

ISBN-13: 978-1430242512

HTML5 Programming for ASP.NET Developers

Bipin Joshi

ISBN13: 978-1-4302-4719-7

Requirements:

- Internet access
- An email account
- Canvas enrollment
- CS Department account
- Microsoft Visual Studio 2012 or VS2012 Express
- SQL Server Express
- Account with an IIS service provider (like Arvix or GoDaddy)

COURSE GOAL:

To provide students with a more in depth look at three-tiered web programming. Topics of discussion will include HTTP, stateless programming, ASP.NET forms and controls, MVC applications, session management, Razor, LINQ, SOAP, AJAX, web services and mobile browsing.

REQUIREMENTS:

You must have completed CSCD211 and CSCD327 with a GPA of 2.5 or greater. Proficiency in C# or Java object-oriented programming is assumed.

You must have basic math proficiency (math 105) and computer literacy clearance to be enrolled in this class. Basic ability in algebra and geometry is assumed on assignments.

Come to class prepared. This means read the chapter which is being discussed in class and review notes regularly. Also, it is IMPERATIVE that you begin work on assignments as soon as possible. This will give you sufficient time to resolve errors, seek help (from the instructor and from tutors), and properly test your solutions.

You must have a good work ethic and enjoy solving problems. These items are fundamental to success in this class and this field.

TENTATIVE TOPIC SCHEDULE:

NOTE: make sure you read the appropriate chapter sections in the book BEFORE we begin covering the topic in class. Lectures are based on you having read over the material that is being covered.

Week	Topic	Assignment
1	Configuration for ASP.NET programming	Published proof-of-concept
2	The Three-tier programming model	HTML5, CSS3 and JavaScript review
3	Database design & creation C# with MS Access and MySQL	Database assignment 1 – Input
4	Visual Programming	
5	AJAX Basics and Data validation	Database assignment 2 – Output
6	AJAX, LINQ & .NET application integration with MS Office	AJAX or LINQ application
7	MVC Applications	Multi-browser application & presentations
8	Microsoft SQL Server	
9, 10	Group project	
10, 11		Presentations

GRADING:

Grading Area	Number	Percentage of Class Grade
Assignments	5	40
Quizzes & Labs	2 & 4	10
Exams	2	25
Final Exam	1	25

Numerical percentage is calculated based on the following scale.

Assignments	40%	total points earned on all assignments / total assignment points * .40
Quizzes	10%	total points earned on all quizzes/ total quiz points * .10
Exams	25%	total points earned on all tests / total test points * .25
Final	25%	total points earned on the final / 200 * .25

After summing the percentages, the conversion to grade point system is as follows

95 - 100%	4.0
62 - 94%	subtract 0.1 grade point for each percentage point less than 95
60 - 62%	0.7
0 - 59%	0.0

Some specific conversions: 95/4.0, 90/3.5, 85/3.0, 80/2.5, 75/2.0, 70/1.5, 65/1.0

GENERAL POLICIES:

ADA. Americans with Disabilities Act: If there is any student in this class who has special needs for accommodation, please feel free to discuss the matter with the instructor. Students requiring accommodations need to contact Karen Raver, Director of Disability Support Services (DSS). She can be reached at (509) 359-6871. The DSS Office is located in PUB215D.

Exams. No makeup exams will be given without prior arrangements having been made, or in the case of a DOCUMENTED emergency after the fact.

Homework. Homework assignments will be in the form of programming projects, each worth 50 points unless otherwise noted. Assignments are due BY THE REQUIRED TIME on the due date. Thereafter they will lose 20% per school day that they are late, as determined by the date stamp entered via the Blackboard System. Assignments that are turned in more than a week late will not receive credit, but will count as turned in provided they work to specifications.

Professional Behavior. You are expected to act in accordance with the department's 'Code of Professional Conduct for Students'. This means cheating will not be tolerated. Students who copy another's program/work may be subject to severe disciplinary action, which may include a course grade of 0.0 and a written statement in his/her permanent record.

Respect your classmates and your instructor and do not talk in class when the instructor or someone else is speaking.

Incompletes. Incompletes are subject to this restriction: "PASSING work/progress must be demonstrated through *three* weeks prior to the end of the term." Incompletes must be requested prior to finals week. Incompletes will not be granted without mitigating circumstances. (Dissatisfaction with your grade is NOT a mitigating circumstance!)

Lectures. Attendance is not required. If you choose not to come to class then please do not use my office hours as a substitute for attending lectures. Those that attend regularly and participate in class discussion will be rewarded accordingly when final grades are calculated! Classroom activities will complement, not necessarily duplicate, the text. Furthermore, you are accountable for material covered in class, so you miss class at your own risk!

Preparation. You are expected to read material from the chapter in the book that is being discussed in class AHEAD of time (see the syllabus for a list of topics and chapters). Examples given in class and by the authors should be confirmed by the student at home to guarantee complete understanding of the subject.

Syllabus
